FRONTEND DEVELOPMENT INTERNSHIP

TASK GUIDE

Build real-world projects. Strengthen your skills.
Build your portfolio.

SIX ADVANCED PROJECTS — CHOOSE BY YOUR INTERNSHIP DURATION

01 **AI Productivity Workspace**
02 **Personal Finance Dashboard**
03 **Modern E-Commerce Platform**
04 **Event Discovery & Booking**
05 **Project Management Workspace**
06 **AI Research & Knowledge Platform**

INTERNSHIP

Frontend Development

REQUIRED TASKS

1 Month	**Any 2**
2 Months	**Any 3**
3 Months	**Any 4**

FOCUS

UI/UX · Responsive Design · JavaScript · Modern Frontend

IMPORTANT INSTRUCTIONS

Your Internship Tasks

Complete the number of projects required for **your internship duration**, chosen freely from the task list. Each project should be functional, responsive, well-organized and good enough to showcase in your portfolio during internships, placements and interviews.

1 MONTH	2 MONTHS	3 MONTHS
2	**3**	**4**
projects required	projects required	projects required

Choose	Design	Build	Test	Deploy	Submit

BEFORE YOU SUBMIT

- [ ] Complete **all projects required** for your duration
- [ ] Make the project **responsive**
- [ ] Upload the project to **GitHub**
- [ ] Add a **live demo** where applicable
- [ ] Share your work on **LinkedIn** as required
- [ ] Ensure the project is **fully functional**
- [ ] Maintain **clean, organized code**
- [ ] Add a **README** file
- [ ] Submit details via the **submission form**

Submit your completed work here

Once all your required projects are complete, deployed and pushed to GitHub, submit your project details through the official submission form.

> **A note on quality.** These tasks are intentionally beyond beginner exercises. Prioritise a complete, polished experience over a rushed feature list — a well-built application with clean states and thoughtful UI will always interview better than a broken one with more screens.

01 AI Productivity Workspace

ADVANCED Tech: React / JavaScript / HTML / CSS

Build a modern productivity workspace that combines task management, notes, AI assistance and productivity insights into one application.

CORE REQUIREMENTS

- Dashboard
- Task management
- Create, edit and delete tasks
- Task status and priority
- AI assistant / chat interface
- Notes or quick-capture section
- Search and filtering
- Productivity statistics
- Persistent application state
- Responsive design
- Loading, empty and error states

Deliverables: GitHub Repository · Live Demo · README

02 Personal Finance Dashboard

ADVANCED Tech: React / JavaScript

Build a professional personal finance dashboard that helps users understand their income, expenses and spending patterns. Use realistic mock data.

CORE REQUIREMENTS

- Financial overview
- Income and expense summary
- Transaction history
- Category-based spending
- Interactive charts
- Monthly financial analysis
- Budget tracking
- Search and filters
- Transaction details
- Responsive design

Deliverables: GitHub Repository · Live Demo · README

03 Modern E-Commerce Platform

ADVANCED Tech: React / JavaScript

Build a complete modern e-commerce experience for a fictional brand, demonstrating the full customer journey from product discovery through to checkout.

CORE REQUIREMENTS

- Product discovery
- Search
- Category filtering
- Product details
- Product image gallery
- Product variants
- Wishlist
- Shopping cart
- Cart calculations
- Checkout interface
- Order confirmation
- Responsive design

Deliverables: GitHub Repository · Live Demo · README

04 Event Discovery & Booking Platform

ADVANCED Tech: React / JavaScript

Build a platform where users can discover events, view event information and reserve tickets. Use realistic mock event data.

CORE REQUIREMENTS

- Event discovery
- Search
- Category filters
- Date filters
- Event details
- Responsive design
- Venue information
- Ticket selection
- Booking flow
- Booking confirmation
- Saved events

Deliverables: GitHub Repository · Live Demo · README

05 Project Management Workspace

ADVANCED Tech: React / JavaScript

Build a project management application that allows teams to organize projects, tasks and progress. Should demonstrate complex frontend interactions and state management.

CORE REQUIREMENTS

- Workspace dashboard
- Project management
- Kanban board
- Create and edit tasks
- Drag-and-drop task movement
- Responsive design
- Task priority and status
- Team members
- Activity feed
- Search and filtering
- Progress tracking

Deliverables: GitHub Repository · Live Demo · README

06 AI Research & Knowledge Platform

ADVANCED Tech: React / JavaScript

Build a platform that allows users to discover, organize and manage research resources with an AI-assisted interface. Use mock data or publicly available APIs where appropriate.

CORE REQUIREMENTS

- Research dashboard
- Search
- Filters
- Research / resource cards
- Saved resources
- Loading and empty states
- Categories and tags
- Resource details
- AI summary interface
- Reading / progress state
- Responsive design

Deliverables: GitHub Repository · Live Demo · README

> **Project selection.** Choose freely from the six above — **any 2** for a 1-month internship, **any 3** for 2 months, **any 4** for 3 months. You are encouraged to pick projects that match your interests and let you demonstrate different frontend skills.

FINAL STEP

Ready to Submit?

Run through this checklist before you send your work in.

- [ ] Completed all projects required for your duration
- [ ] Project is functional
- [ ] Responsive on desktop and mobile
- [ ] Code is properly organized
- [ ] LinkedIn post completed where required
- [ ] GitHub repository created
- [ ] README added
- [ ] Live demo added
- [ ] Submission form completed

Submission Form

Submit your project details, repository links and live demo URLs here.

https://forms.gle/vxL5JE8cvRXXfDBv8

BUILD SOMETHING WORTH SHOWING.

Your internship project is more than a task — it's an opportunity to demonstrate what you can build.
