internStudio

Institutional Training & Skilling Partner

AI LAUNCHPAD PROGRAM

INSTITUTIONAL PARTNERSHIP · FOR COLLEGES

DURATION	MODE	FITS	RUN BY
3 months	Live + recorded	Industrial training	InternStudio

The AI Launchpad Program gives your students a complete, industry-relevant industrial training in Python, SQL, machine learning, backend development and AI tools, run entirely by InternStudio. Diploma students can take it before third year, and every student gets guidance for their final-year project. The college signs one MoU; we handle the teaching, hands-on practice, assessment and certification, and keep the college informed through reports.

HOW THE PARTNERSHIP WORKS

01 Sign the MoU
InternStudio and the college agree the batch, schedule and roles.

02 Enrol students
The college shares the student list; we set up every LMS account.

03 Classes & hands-on
Live online classes and recorded lessons, with hands-on practice.

04 Reports to college
Progress reports from the LMS and project evaluation per student.

05 Certificates
Certificates of Completion, verifiable online, for every eligible student.

WHAT STUDENTS LEARN

MODULE 1 — Python, basic to advanced
Core programming, data structures, functions, OOP, files and working with libraries, practised through hands-on exercises.

MODULE 2 — SQL, basic to advanced
Queries, joins, aggregations and database design, and connecting Python applications to a database.

MODULE 3 — Machine learning fundamentals
Working with data in NumPy and Pandas, the ML workflow, and building and evaluating models with scikit-learn.

MODULE 4 — Backend development with Python
Building APIs and web backends with FastAPI, Django and other frameworks: databases, authentication and deployment.

MODULE 5 — AI tools for real work
Using AI tools to build websites and apps, live, and to get everyday development tasks done faster.

MODULE 6 — Real-world projects & career
Solving real-world problems, planning and building the final-year project, CV building and interview preparation.

Final-year project guidance for every student
Students learn to pick a real-world problem and plan, build and present their own final-year project, working alongside their college guide.

WHAT INTERNSTUDIO HANDLES

- Curriculum, live classes and recorded lectures
- Qualified trainers and hands-on practice in every session
- LMS accounts, quizzes, assignments and doubt support
- Assessment, project evaluation and certification

RECORDS THE COLLEGE RECEIVES

- Progress reports for every student from the LMS
- Project evaluation for the final project
- Certificates verifiable at lms.internstudio.in/verify

WHAT THE COLLEGE PROVIDES

- The list of students joining the program
- A faculty coordinator as the single point of contact
- A slot in the timetable for live sessions
- A computer lab with internet, where available

PROGRAM FEE

₹1,999 per student, one-time

Covers live or recorded classes, full LMS access, hands-on projects, final-year project guidance and the certificate. No other charges to students.

Partner with InternStudio

Sign an MoU and bring the AI Launchpad Program to your students.
