Institutional Training & Skilling Partner

AI LAUNCHPAD PROGRAM

AI & PYTHON TRAINING PROGRAMME

DURATION	MODE	OPEN TO	HANDS-ON
3 months	Live + recorded	Anyone interested	Guided by trainers

InternStudio's AI Launchpad Program is a 3-month program open to everyone who wants to learn AI and Python, and diploma students can take it as their industrial training before third year. Learn Python, SQL, machine learning, backend development and AI tools, live or at your own pace, with final-year project guidance, real projects and interview practice. Teaching, hands-on and evaluation are all run by InternStudio.

HOW THE PROGRAM WORKS

01 Learn
Python, SQL, machine learning and backend development, from basics to advanced.

02 Build
Hands-on in every session: websites and apps built live with AI tools.

03 Solve real problems
Real-world problem sessions that lead straight into the final-year project.

04 Practise & assess
Quizzes, assignments and project reviews on the LMS to track every student's progress.

CURRICULUM

MODULE 1 — Python, basic to advanced
Core programming, data structures, functions, OOP, files and working with libraries, practised through hands-on exercises.

MODULE 2 — SQL, basic to advanced
Queries, joins, aggregations and database design, and connecting Python applications to a database.

MODULE 3 — Machine learning fundamentals
Working with data in NumPy and Pandas, the ML workflow, and building and evaluating models with scikit-learn.

MODULE 4 — Backend development with Python
Building APIs and web backends with FastAPI, Django and other frameworks: databases, authentication and deployment.

MODULE 5 — AI tools for real work
Using AI tools to build websites and apps, live, and to get everyday development tasks done faster.

MODULE 6 — Real-world projects & career
Solving real-world problems, planning and building the final-year project, CV building and interview preparation.

PROGRAM FEE

₹1,999 ~~₹4,999~~ 60% OFF

Per student, one-time. Everything below is included:

Final-year project guidance INCLUDED
Pick a real-world problem, then plan, build and present your own project.

- Live classes or recorded: your choice (Zoom)
- Full LMS access: lectures, notes, quizzes, assignments
- Hands-on assignments and projects, reviewed by trainers
- Real-world problem-solving sessions
- Doubt support throughout the program
- CV building and interview preparation sessions
- Certificate of Completion, verifiable online

FOR COLLEGES

- Covers the industrial training before third year
- Run end-to-end by InternStudio: teaching, hands-on and evaluation
- Final-year project guidance for every student
- Progress reports shared with the college
- A signed MoU between InternStudio and the college

CAMPUS AMBASSADOR

Students can earn too: ₹200 for every successful AI Launchpad enrollment they refer, plus InternStudio merchandise and an official Ambassador Certificate.
